Standard sheet Size: 2440 x 1220mm (8'x4') FT  
Thickness: 1.2mm ( $\pm 5\%$ )

**RANGE:** These laminates come in a wide range of designs & colours.

**ADHESIVE:** These laminates one easy to apply with the standard laminating system, including most of the conventional adhesives normally used with plastic laminates such as many water based. We do not recommend the use of heat activated adhesives.

**LAMINATION:** Proper substrates must be used and careful bonding procedures must be observed. Substrates should be of good quality plywood, high density particle board, or high quality board. The face of the substrate must be smooth and free of grease, wax, dust, chips and other foreign matter.

**CUTTING & INSTALLATION:** These Flexible PVC Laminate Sheets can be cut, routed and drilled with standard wood working tool or equipments ( Meraki recommends use only Diamond Cutter Blades ). All blades must be sharp to remove any burrs that may occur in the cutting process. We recommend the use of a smooth file to feather all corner edges.

**BENDING & FORMING:** For Bending the laminates Sheet Make use of **4" x 8mm x 6** Tee Radius U - Groove Blade. The Groove should be of Depth **0.6mm to 0.8mm** & Width **5mm** or more. The routed sheet will easily bend up to **90°**.

Blades

**Maintenance:** Any cleaning agent containing acids, alkalis or abrasive should not be used to clean the PVC Laminates. Exposure to sunlight should be avoided.

**Note:** MERAKI warrants that all its products are free from manufacturing defects and perfectly ideal for use in normal conditions. In case of any claim, the liability of the company is only limited to the cost of the product only. Meraki is not liable for the color variations from batch to batch production. The sample swatches here only represent the designs, colors and finishes. They do not represent actual thickness.

\* KINDLY REMOVE THE PROTECTIVE FILM AFTER 7 DAYS OF INSTALLATION OF PVC LAMINATES.

\*Sample pasted by MERAKI represents only colour and finish , may not be of actual thickness.
